

**AZERBAIJAN MEDICAL
UNIVERSITY**

**SYLLABUS OF SUBJECT
OF ONCOLOGY**

for students of
I-II treatment and prevention faculties

CONFIRMED BY

Head of Oncology Department,
academician A.T. Amiraslanov
Signature _____

11.09.2020

CODE OF THE SUBJECT:

070101

NAME OF SUBJECT:

Oncology

FORM OF TEACHING THE SUBJECT:

visual

TYPE OF SUBJECT:

compulsory consistent subject of the specialty

TRAINING LOAD (HOURS) TOTAL:

120

SUBJECT TEACHING YEAR:

2020-2021

SEMESTRY OF TEACHING

XI or XII

NUMBER OF CREDITS (1 credit every 30 hours) 8 credits

LANGUAGE OS SUBJECT:

Azerbaijan, russian, english

TUITORS:

acad. A.T. Amiraslanov

prof. A.Y. Gaziyev

prof. N.M. Amiraliyev

prof. R.B. Bayramov

prof. A.A. Amiraslanov

ass.prof. Y.A. Nuriyev

ass.prof. J.B. Jamalov

ass.prof. E.E. Ibrahimov

ass.prof. N.I. Mehdiyeva

ass.prof. T.S. Guliyeva

ass.prof. Y.M. Hetemov

ass.prof. G.I. Kerimova

ass.prof. E.R. Huseynov

ass.prof. R.Sh. Gurbanova

ass.prof. R.T. Abdullayeva

ass.prof. Sh.D. Tagiyev

ass. I.U. Jeferova

ass. V.R. Ismail
ass. S.S. Mammadova
ass. H.G. Veliyeva
ass. A.S. Ismanly
ass. N.G. Gibleliyeva

PHONE NUMBERS OF DEPARTMENT: (012) 541-59-77; 78
E-MAIL OF DEPARTMENT: department_oncology@amu.edu.az

Required textbooks and tutorials:

Main:

1. Ə.T. Əmiralanov, A.Y. Qaziyev. Onkologiya (2010). Dərslik.
2. R.B. Bayarmov. Onkologiya (2016). Dərslik.
3. Ə.T. Əmiraslanov, A.Y. Qaziyev, N.İ. Mehdiyeva. Süd vəzisi xərçəngi (2013). Dərs vəsaiti.
4. Ə.T. Əmiraslanov, Z.Ə. Səfərov, A.Y. Qaziyev, T.S. Quliyeva, Y.M. Hətəmov. Ağciyər xərçəngi (2016). Dərs vəsaiti.
5. Ганцев Ш. Х. Онкология (2006). Dərslik.
6. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник
7. F.Cavalli F., S.B. Kaye, H.H.Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009.

Additional:

1. Ə.T. Əmiraslanov, A.Y. Qaziyev. Uşaq onkologiyası (2010). Dərslik.
2. Ə.T. Əmiraslanov, R.B. Bayramov. Abdominal onkologiya (2004). Dərslik.
3. Namiq Əmirəliyev, Azər Əmiraslanov. Baş-boyun şisləri (2012). Dərslik.
4. А.И. Пачес. Опухоли головы и шеи. Клиническое руководство. 2013
5. Клинические рекомендации общероссийской организации «Российские общество онкомаммологов» по диагностике и лечению рака молочной железы. Под редакцией В.Ф. Семиглазова, Р.М. Палтуаева, Москва, 2018
6. Biglia N., Peccatori F.A. (Eds.) Breast Cancer, Fertility Preservation and Reproduction (2015).
7. Blanke Charles D., Rödel Claus, Talamonti Mark S. Gastrointestinal Oncology: A Practical Guide (2011).
8. Barakat R.R. Principles and Practice of Gynecologic Oncology. 5th ed. – Lippincott Williams & Wilkins (2009).

I. The description and purpose of the subject:

Brief description of the course: Up-to-date problems of oncology: factors and precancerous diseases leading to malignant tumor development, prophylaxis of cancer, screening. The types of oncologic institutions, their function, oncologic service, oncological deontology. Implementation of medical, physical, social and psychological rehabilitation in oncology.

the main aspects of oncological diseases: epidemiology of malignant tumors, cancerogenesis, biological properties, morphology, progressing, nomenclature and classification of tumors, diagnostics and treatment.

Learning the most prevalent malignant tumors – the prevalence and incidence of these tumors, cancerogenesis, biological properties, histologic variants, progressing, staging, diagnostics, treatment and prognosis. Up-to-date treatment strategy of tumors according to histologic variants and stages.

Purpose of the course: Giving comprehensive knowledge to the students on the etiology, growth, development, spreading mechanisms, prevention, diagnostics and treatment of malignant tumors.

II. Calendar of the subject:

Weeks*	Topics an their short review	Lecture	Seminar	Hours	Date*
I Week Day 1	<p>Topic № I Bədxassəli şışlərin etiologiyası və patogenezi. Kanserogenetika haqqında müasir baxışlar.</p> <p>Short review: Theories of the development of malignant tumors (chemical, physical, viral, hereditary and irritant theories). Chemical carcinogenesis (polycyclic aromatic hydrocarbons, aromatic nitrogen compounds, metals and inorganic salts). Physical carcinogenesis (ionizing radiation, ultraviolet radiation, mechanical and thermal factors). Biological carcinogens (viruses containing DNA and RNA). Atypicality (biochemical, functional, morphological, cytological, histological, immunological). Theoretical materials on the topic, modern views become the object of interactive discussion in the lecture.</p> <p>Oxu materialları (kitabın adı, müəlliflər): 1. Ə.T. Əmiraslanov, A.Y. Qaziyev.</p>	2	–	2	

	<p>Onkologiya.</p> <p>2. R.B. Bayarmov. Onkologiya (2016). Dörslik.</p> <p>3. Руководство по онкологии. Том I, II, III. Минск 2016</p> <p>4. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник.</p> <p>5. Ганцев Ш.Х. Онкология (2006). Dörslik.</p> <p>6. F. Cavalli F., S.B. Kaye, H.H. Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009.</p>				
I Week Day 2	<p>Topic №1</p> <p>Acquaintance with oncologic clinic. Types of oncologic institutes. Clinical groups. Principles of deontology in oncology.</p> <p>Epidemiology and prophylaxis of malignant tumors.</p> <p>Short review:</p> <p>Acquaintance with Oncologic Clinic of AMU. Information about National Center of Oncology. Oncologic Clinic, Oncologic Dispensers, oncologic departments and cabinets, and their tasks. Characteristic ov deontology in the field of Oncology.</p> <p>Registration of patients accordin to clinic groups.</p> <p>Information about epidemiologic properties of oncologic diseases. Oncological diseases as a clinical burden on society and state. Statistics and dynamics of oncologic diseases. Spread of malignant tumors according to geography, age and sex. Survival parameters of patients with malignant tumors.</p> <p>Prophylaxis of malignant tumors: phimary and secondary prophylaxis.</p> <p>Topic is dicussed onthe basis of theoretical khnowledge, slides.</p> <p>Literature (name of books, authors):</p> <p>1. Ә.T. Әmiraslanov, A.Y. Qaziyev. Onkologiya.</p> <p>2. R.B. Bayarmov. Onkologiya (2016). Dörslik.</p> <p>3. Руководство по онкологии. Том I, II, III. Минск 2016</p> <p>4. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник.</p> <p>5. Ганцев Ш. Х. Онкология (2006). Dörslik.</p>	–	2 hours	2 hours	6 hs

	6. F. Cavalli F., S.B. Kaye, H.H.Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009.. – Lippincott Williams & Wilkins (2009).				
II Week Day 3	<p>Topic № 2</p> <p>Pathology of malignant tumors, tumor growth. Recurrence and metastasis</p> <p>Short review:</p> <p>Malignant cells properties. Transformation of normal cells into malignant ones. Protooncogenes and tumor suppressor genes.</p> <p>Atypism: cellular atypism, tissue atypism. Metaplasia and dysplasia. Classification and nomenclature of tumors. Local recurrence. Routes and mechanisms of metastasis. TNM classification.</p> <p>Topic is discussed on the basis of theoretical knowledge, slides.</p> <p>Literature (name of books, authors):</p> <ol style="list-style-type: none"> 1. Ә.Т. Әмірасланов, А.Ү. Қазиев. Онкология. 2. Р.Б. Баярмов. Онкология (2016). Dörslik. 3. Руководство по онкологии. Том I, II, III. Минск 2016 4. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник. 5. Ганцев Ш. Х. Онкология (2006). Dörslik. 6. F. Cavalli F., S.B. Kaye, H.H.Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009. 	2 hours	4 hours	6 hs	
II Week Day 4	<p>Topic № 3</p> <p>Diagnostics and screening of malignant tumors. Screening.</p> <p>Short review:</p> <p>Clinical examination – subjective (complaints of patients, history of disease, medical history), objective (inspection, palpation, percussion, auscultation).</p> <p>X-ray examination, CT, MRI, PET-scan, scintigraphy, endoscopy, pathological examination, laboratory tests.</p> <p>Screening, its tasks and significance.</p> <p>Students take place in diagnostic rooms as far as possible. They get to know the technical aspect of CT, MRI, endoscopy and interpret the report of instrumental examinations under the supervision of the professor. They learn about the diagnostic</p>	2 hours	4 hours	6 hs	

	<p>value od tumor antigenes.</p> <p>Topic is discussed on the basis of films, slides.</p> <p>The students take part in the discussion of the appropriate patients.</p> <p>Literature (name of books, authors):</p> <ol style="list-style-type: none"> 1. Ә.Т. Әmiraslanov, А.Ү. Qaziyev. Onkologiya. 2. R.B. Bayarmov. Onkologiya (2016). Dərslik. 3. Руководство по онкологии. Том I, II, III. Минск 2016 4. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник. 5. Ганцев III. X. Онкология (2006). Dərslik. 6. F. Cavalli F., S.B. Kaye, H.N.Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009. 7. Blanke Charles D., Rödel Claus, Talamonti Mark S. Gastrointestinal Oncology: A Practical Guide (2011). 8. Barakat R.R. Principles and Practice of Gynecologic Oncology. 5th ed. – Lippincott Williams & Wilkins (2009). 			
III Week Day 5	<p>Topic №4</p> <p>Treatment methods of malignant tumors.</p> <p>Palliative aid to oncologic patients.</p> <p>Short review</p> <p>Surgical method of treatment. Types of surgery in patients with malignant tumors.</p> <p>Types of radical surgery : radical, palliative and symptomatic surgery. Combined and extended surgery.</p> <p>Definition of ablasyt and antiblasty.</p> <p>Definition of resectability, operability, curability.</p> <p>Radiotherapy. Radical and palliative radiotherapy. Neoadjuvant and adjuvant radiotherapy.</p> <p>Chemotherapy. Neoadjuvant and adjuvant chemotherapy. Target therapy.</p> <p>Classes of chemotherapy agents. Ways of chemotherapy.</p> <p>Multidisiplinary treatment of oncologic diaseases.</p> <p>Hormonal and antihormonal treatment. Immunotherapy. Palliative aid to the oncologic patients. Hospis.</p> <p>The students see the surgery in the surgery</p>	2 hours	4hours	6 hs

	<p>room or by real-time monitor. Indications to radiotherapy, chemotherapy, target therapy, hormonal therapy are discussed. Students get to know the ways of chemotherapy in the chemotherapy rooms.</p> <p>The students are given the opportunity to train some practice.</p> <p>Theoretical aspects of the topic are discussed interactively on the basis of slides at lecture.</p> <p>Literature (name of books, authors):</p> <ol style="list-style-type: none"> 1. Ә.T. Әmiraslanov, A.Y. Qaziyev. Onkologiya. 2. R.B. Bayarmov. Onkologiya (2016). Dörslik. 3. Руководство по онкологии. Том I, II, III. Минск 2016 4. Под редакцией академика РАН М.И. Давыдова. Онкология. Клинические рекомендации (2015). Dörslik. 5. Ганцев Ш.Х. Онкология (2006). Dörslik. 6. F.Cavalli F., S.B. Kaye, H.H.Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009. 7. Blanke Charles D., Rödel Claus, Talamonti Mark S. Gastrointestinal Oncology: A Practical Guide (2011). 8. Barakat R.R. Principles and Practice of Gynecologic Oncology. 5th ed. – Lippincott Williams & Wilkins (2009). 			
III Week Day 6	<p>Topic № 5</p> <p>Oral mucosa cancer.</p> <p>Lip cancer</p> <p>Short review:</p> <p>Epidemiology of lip cancer. Incidence and mortality. Causes and pathogenesis. Environmental factors, life style contributing to the development of oral mucosa carcinoma – smoking, smokeless tobacco use, HPV-infection, dental problems. Intrinsic factors. Precancerous conditions – leukoplakia, verrucous leukoplakia, erythroplakia, submucosal fibrosis, lichen planus, nicotine stomatitis. Inherited aspects of oral mucosa cancer – xeroderma pigmentosum, anemia Fanconi. Measures of prevention. Pathology of lip cancer, TNM classification. Growth and spread. Regional and distant metastases. Clinical variants. Clinical presentations. Diagnostics. Differential diagnosis.</p>	– 2 hours	2 hours 2 hours	6 hs

	<p>Treatment methods – surgery, radiotherapy, chemotherapy. Multidisciplinary treatment. Long term results of treatment.</p> <p>Supply the participation of students at the examination of patients with appropriate tumor. The cases are discussed with the students.</p> <p>Epidemiology, incidence, morbidity of cancer of oral mucosa. Etiology and cancerogenesis of cancer of oral mucosa. Precancerous diseases and conditions of cancer of oral mucosa.</p> <p>Pathology of cancer of oral mucosa.</p> <p>Lymphogenic and hematogenic metastasis of cancer of oral mucosa.</p> <p>Clinical presentations of cancer of oral mucosa.</p> <p>Diagnostics of cancer of oral mucosa.</p> <p>Staging of cancer of oral mucosa.</p> <p>Management of cancer of oral mucosa.</p> <p>Assesment of long-term results of treatment for cancer of oral mucosa.</p> <p>Discussion of patients with the participation of the students.</p> <p>Theoretical materials, slides are used at lecture.</p> <p>The appropriate patients are discussed, practical skills are demonstrated according to the theme.</p> <p>Literature (name of books, authors):</p> <ol style="list-style-type: none"> 1. Ə.T. Əmiraslanov, A.Y. Qaziyev. Onkologiya. 2. R.B. Bayarmov. Onkologiya (2016). Dərslik. 3. Namiq Əmirəliyev, Azər Əmiraslanov. Baş-boyun şışləri (2012). Dərslik. 4. Руководство по онкологии. Том I, II, III. Минск 2016 5. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник. 6. Ганцев Ш. Х. Онкология (2006). Dərslik. 7. А.И. Пачес. Опухоли головы и шеи. Клиническое руководство. 2013 8. F. Cavalli F., S.B. Kaye, H.H. Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009. 			
IV Week Day 7	Topic № 6 Thyroid cancer	-	4 hour	4 hs

	<p>Short review:</p> <p>Cause and cancerogenesis of thyroid cancer.</p> <p>Risk factors and precancerous diseases. Precancerous conditions – follicular adenoma, atypical adenoma, Hashimoto thyroiditis. MEN 2 syndrome, familial medullary carcinoma. Cowden syndrome, dyshormonogenetic goiter. Measures of prevention</p> <p>Histologic variants. TNM stage and group staging.</p> <p>Ways of metastasis – lymphogenic and hematogenic metastases.</p> <p>Clinical manifetasions of thyroid cancer.</p> <p>Diagnostics – physical examination, fine needle biopsy, radioisotope examination, ultrasonography. Clinical staging.</p> <p>Differential diagnostics.</p> <p>Treatment of thyroid cancer. Management in metastatic cases. Surgery, Chemotherapy, radiotherapy. Survival of patients with thyroid cancer.</p> <p>Discussion of patients with the participation of students according to the theme. Condition is arranged for interactive discussion of the students.</p> <p>Literature (name of books, authors):</p> <ol style="list-style-type: none"> 1. Ә.Т. Әmiraslanov, А.Ү. Qaziyev. Onkologiya. 2. R.B. Bayarmov. Onkologiya (2016). Dörslik. 3. Руководство по онкологии. Том I, II, III. Минск 2016 4. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник. 5. Ганцев Ш. Х. Онкология (2006). Dörslik. 6. F. Cavalli F., S.B. Kaye, H.N.Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009. 			
IV Week Day 8	<p>Topic №7</p> <p>Skin cancer.</p> <p>Short review:</p> <p>Epidemiology, incidence, morbidity of skin cancer. Etiology and cancerogenesis. Etiology and pathogenesis. UV-radiaton, ionizing radiation, smoking, HPV-infection,</p>	–	4 hours	4 hs

	<p>HIV-infection, arsenic exposure. Precancerous conditions – discoid lupus erythematosus, psoriasis, Bowen disease, Queyraterythroplasia, skin horn, skin papilloma, keratoacanthoma, skin tags, actinic keratosis. Histological forms – basal cell, squamous cell carcinomas. Xeroderma pigmentosum, Gorlin's syndrome, oculocutaneal albinism, syndrome Werner. Pathology of skin cancer.</p> <p>Lymphogenic and hematogenic metastasis of skin cancer.</p> <p>Clinical presentations of skin cancer.</p> <p>Diagnostics of skin cancer. Staging.</p> <p>Management of skin cancer.</p> <p>Assesment of long-term results of treatment for skin cancaer.</p> <p>Discussion of patients with the participation of the students.</p> <p>The appropriate patients are discussed, practical skills are demonstrated according to the theme.</p> <p>Literature (name of books, authors):</p> <ol style="list-style-type: none"> 1. Ө.Т. Өмірасланов, А.Ү. Қазиев. Онкология. 2. R.B. Bayarmov. Онкология (2016). Dərslik. 3. Руководство по онкологии. Том I, II, III. Минск 2016 4. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник. 5. Ганцев Ш. Х. Онкология (2006). Dərslik. 6. F. Cavalli F., S.B. Kaye, H.H.Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009. 				
V Week Day 9	<p>Topic №8</p> <p>Skin melanoma</p> <p>Epidemiology, incidence, morbidity of malignant melanoma. Geographical aspects of epidemiology. Etiology and cancerogenesis. Skin types. Etiology and pathogenesis – Environmental factors – UV-radiation exposure. Predisposing pathologies – melanocytic nevi, dysplastic nevi, Sutton nevi, junctional nevi. Inherited-genetic syndromes – xeroderma pigmentosum, FAMMM. Types of nevi.</p> <p>Pathology of malignant melanoma.</p> <p>Lymphogenic and hematogenic metastasis of malignant melanoma.</p>	-	4 hours	4 hs	

	<p>Clinical presentations of malignant melanoma.</p> <p>Diagnostics of malignant melanoma.</p> <p>Staging of malignant melanoma.</p> <p>Management of malignant melanoma.</p> <p>Assesment of long-term results of treatment for malignant melanoma.</p> <p>Discussion of patients with the participation of the students.</p> <p>The appropriate patients are discussed, practical skills are demonstrated according to the theme.</p> <p>Literature (name of books, authors):</p> <ol style="list-style-type: none"> 1. Ө.T. Өmiraslanov, A.Y. Qaziyev. Onkologiya. 2. R.B. Bayarmov. Onkologiya (2016). Dörslik. 3. Руководство по онкологии. Том I, II, III. Минск 2016 4. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник. 5. Ганцев Ш. Х. Онкология (2006). Dörslik. 6. F. Cavalli F., S.B. Kaye, H.H.Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009. 				
V Week Day 10	<p>Topic № 9</p> <p>Lung cancer</p> <p>Epidemiology, incidence, morbidity of lung cancer. Ethiology and cancerogenesis of lung cancer. Precancerous diseases and conditions of lung cancer.</p> <p>Pathology of lung cancer.</p> <p>Lymphogenic and hematogenic metastasis of lung cancer.</p> <p>Clinical presentations of lung cancer.</p> <p>Diagnostics of lung cancer. Staging.</p> <p>Management of lung cancer.</p> <p>Assesment of long-term results of treatment.</p> <p>Discussion of patients with the participation of the students.</p> <p>Theoretical aspects of the topic is discussed interactively on the basis of slides at lecture.</p> <p>The appropriate patients are discussed, practical skills are demonstrated according to the theme.</p> <p>Literature (name of books, authors):</p> <ol style="list-style-type: none"> 1. Ө.T. Өmiraslanov, A.Y. Qaziyev. 	2hours	4hours	6 hs	

	<p>Onkologiya.</p> <p>2. Ә.Т.Әmiraslanov, Z.Ә. Səfərov, A.Y.Qaziyev, T.S.Quliyeva, Y.M.Hətəmov. Ağciyər xərçəngi (2016). Dərs vəsaiti.</p> <p>3. R.B. Bayarmov. Onkologiya (2016). Dərslik.</p> <p>4. Руководство по онкологии. Том I, II, III. Минск 2016</p> <p>5. Давыдов М.И., Ганцев Ш.Х. Онкология (2020). Учебник.</p> <p>6. Ганцев Ш. Х. Онкология (2006). Dərslik.</p> <p>7. F. Cavalli F., S.B. Kaye, H.H.Hansen et al. Textbook of Medical Oncology. Informa Healthcare, 2009.</p>				
VI Week Day 11	<p>Topic № 16</p> <p>Precancerous diseases of breast cancer</p> <p>Epidemiology, incidence, morbidity precancerous diseases of breast cancer. Etiology and cancerogenesis. Precancerous diseases and conditions precancerous diseases of breast cancer.</p> <p>Pathology precancerous diseases of breast cancer.</p> <p>Clinical presentations precancerous diseases of breast cancer.</p> <p>Diagnostics precancerous diseases of breast cancer. Management precancerous diseases of breast cancer.</p> <p>Assesment of long-term results of treatment precancerous diseases of breast cancer.</p> <p>Discussion of patients with the participation of the students.</p> <p>The appropriate patients are discussed, practical skills are demonstrated according to the theme.</p> <p>Literature (name of books, authors):</p> <p>1. XII Week Curation XXIII day	Topic № 23 Assesment of knowledge of the students. Final assesment and calculating of scores.	-	2 hours	2 hs

*Sequence of topics on special oncology can be changed.

I. Type of examinations – by computer.

II. Assessment during semester and və division of score:

Maximal score – 100 points.

A) *Maximal score during semester – 50point.*

For attendance	10 points
For self-study (referate, presentation, tesseract etc) görə	10points
Note: Copying is not accepted! Short review of tasks related to self-study, conditions of presentation, dateand assessment methodsare showed precisely*	
For practical study.	30points

*Students can present 5 self-study worksassessed by 2 points or 2 presentations assessed by 5 points.

B) *Maximal score according to the results of examination–50 points*

Test examination contains 50 questions,for every questionis given1 point, misanswers affect the result of the examination.

Note: Maximal points acquired for examination must not be less than 17 points.

C) *Final assesment(examination scor plus acquired score during semester):*

D)

91 – 100 points	exellant	A
81 – 90 points	very good	B
71 – 80 points	good	C
61 – 70 points	moderate	D
51 – 60 points	fair	E
less than 50 points	unfair	F
